Objective

Full Stack Developer skilled in WordPress, Webflow, React.js, Node.js and MongoDB. Experienced in building dynamic, user-friendly websites including e-commerce, booking, and listing platforms. Seeking opportunities to deliver scalable, high-quality web solutions that combine modern frontend frameworks with robust backend systems.

Skills

Full Stack Developer:

- WordPress (Elementor), Webflow
- React.js, Node.js, Express.js, MongoDB
- HTML5, CSS3, Tailwind CSS, JavaScript
- Template conversion to fully responsive and dynamic websites

Software:

- VS Code, Figma
- Microsoft Office Suite
- Adobe Suite, Canva
- Familiarity with various other software applications.

Communication:

- Fluent in Bangla and English languages
- Effective communication skills both in verbal and written communication

Leadership:

- Possess the ability to work well in a team and have excellent leadership qualities.
- Highly adaptable and able to work effectively in any situation

Key Projects

- **The Pinnacle Villa Lombok:** A luxury villa booking platform built with WordPress and custom full-stack features, providing seamless reservations and property management.
- **Driving West:** A dynamic website for a travel and lifestyle brand, integrating booking functionality, interactive layouts, and optimized performance.
- **Bloomreach:** A fully customized business website developed on WordPress with advanced backend integrations, delivering a smooth and scalable user experience.
- **Rice & Spice House:** This is an intuitive and user-friendly platform that brings the richness of global cuisine to life. The platform seamlessly integrates advanced web technologies to provide an unparalleled experience for restaurant management and customer interaction.
- **Product Recommendation System:** A full-stack Product Recommendation System with a Node.js/Express backend, React.js frontend, and MongoDB database. Features JWT authentication, RESTful APIs, and responsive design for seamless user experiences.

Education & Qualification

Prime University
BSc in CSE (Computer Science and Engineering)

Dhaka, Bangladesh
Oct 2021 – Nov 2025

- **Introduction to Informatics & Fundamentals of Programming:** Developed a Java-based game, Maze Runner, featuring player navigation, obstacle avoidance, and scoring mechanisms.
- **Algorithms and Data Structures:** Designed and implemented a graph-based social network analysis tool using adjacency lists and depth-first search for efficient friend recommendation and connection visualization.
- **Software Engineering:** Developed a Hadoop-based system for processing and analysing large datasets, implementing custom MapReduce jobs and integrating with Apache Spark for real-time data processing.
- **Operating Systems:** Developed a custom shell in C with basic commands, process management, and I/O Redirection.
- **Discrete Structures:** Implemented a graph-based social network analysis tool using adjacency lists and depth-first search algorithms for efficient friend recommendations and connection visualization.

Experience

FREELANCE

Los Angeles, USA (Remote)

Frontend Designer

Nov 2019 – Jan 2025

- Designed and developed visually appealing, user-friendly websites for private and local clients.
- Utilized HTML5, CSS3 and JavaScript to meet client specifications.
- Integrated WordPress customization using Elementor for enhanced functionality.

360 Elevate

Shyamoli, Dhaka

Jr. WordPress Developer

July 2025 - Present

- Collaborate with the IT team to ensure system uptime, enhancing technical troubleshooting and problem-solving skills.
- Implement and manage marketing campaigns through backend CMS, developing expertise in digital marketing strategies.
- Conduct biweekly audits, identifying and resolving broken links, bugs and improving backend system management.
- Develop and maintain documentation for IT processes, improving team efficiency through systematic approaches.

Language

English (Fluent), Bengali (Native), German (A2)

Interests

I have a deep passion for reading, constantly expanding my knowledge and exploring new perspectives. At the same time, I love designing creative and user-friendly web interfaces that blend innovation with aesthetics. As a frontend developer, I focus on building interactive, efficient, and visually appealing web applications. I stay updated with the latest technologies and frameworks to enhance my skills and keep up with industry trends. Solving complex problems and optimizing web performance excites me, as I strive to deliver seamless and engaging user experiences.
